Collectible Design Rooted in craftsmanship.
Defined by emotional presence

Anca Fetcu Studio is an art and design studio based in Transylvania, Romania.

We create emotionally resonant lighting, mirrors and collectibles at the intersection of craftsmanship, storytelling and contemporary design.

Produced in-house together with local suppliers, each of our products are designed to bring warmth, emotional presence and lasting meaning into contemporary interiors.

We create

COLLECTIBLE & LIMITED EDITIONS COLLECTIONS
and products for
HOSPITALITY & INTERIOR PROJECTS

WHY WORK WITH US?

Original design

Each product is designed in-house, not re-sold.
Alongside our proposed collections, we love bespoke projects.

In-house production

That means complete control over materials, finishes, execution times.

Consistent quality

After proofing the prototype with the client, we manually check each piece before delivery, to ensure best quality.

B2B flexibility

Our products are customizable, by size and colour. You just need to write us an email with your enquiries and we'll design and produce custom items for you.

For hospitality projects, we adapt and personalise our products, to perfectly fit projects requirements.

Scalable production capacity

We can ensure batches of 20–50–100 pcs for projects or stores.

Smooth collaboration

We are very adaptable, so working with us means attention and focus on clients needs. We take into consideration time, budget and design requirements and offer optimal solutions to architects, buyers and developers.

International presence

Our products have been very well received in 2025 at Fiera Milano and Blickfang Vienna.

HOLDING LIGHT COLLECTION

ARTIST'S STATEMENT

I strongly believe that, today, people are in great need of spiritual anchors, of spaces that can become islands of rest and safety. Holding Light aims to illuminate spaces through characters that inspire much-needed states of mind.

Holding Light is a collection of evolving sculptural companions that explores the emotional relationship between people, objects and light.

At the heart of the collection is the Holding Light Base - the permanent foundation designed to house interchangeable sculptural characters.

Each character occupies the base, transforming it into a complete lighting object, with its own emotional presence and identity.

The Holding Light Base is made in an open edition. It remains the permanent platform of the collection and can accompany different characters throughout its existence.

The sculptural characters constitute the artistic works of the Holding Light universe and can be released as:

- Limited numbered editions
- Open editions
- One-off pieces

LOTUS COLLECTION

ARTIST'S STATEMENT

I believe design can help create spaces that offer a sense of calm, safety and emotional grounding in an increasingly overwhelming world.

Lotus collection reflects this approach through sculptural lighting inspired by the lotus flower — a symbol of purity, resilience and spiritual awakening.

Lotus reminds us that we have the strength to rise above the challenges of today's world. Delicate yet structured, fragile yet powerful, its presence is both calming and mesmerizing.

Inspired by the organic geometry of the lotus flower, the collection translates its layered petals into sculptural lighting pieces that bring softness, rhythm and a distinctive presence to a space.

The collection includes wall, ceiling, table and floor lamps, allowing the same visual language to flow throughout an interior.

From individual statement pieces to larger compositions, Lotus can adapt to residential, hospitality and contract environments.

Each Lotus piece becomes a luminous sculptural element — creating atmosphere during the day and transforming through light after dark.

ECHOES COLLECTION

ARTIST'S STATEMENT

I believe that by remembering the past, we can better appreciate the present. Echoes is a storytelling collection of sculptural mirrors, a portal into history, where shapes and forms evoke the architectural memory of past cultures and civilizations.

The first piece in the Echoes collection, Roma wall mirror pays tribute to one of the world's most influential civilizations.

Inspired by the rhythm of Roman arches and the poetic beauty of their surviving ruins, the mirror explores how time reshapes architecture into emotion.

The mirror is made of a single sheet of sandblasted smoked glass mirror.

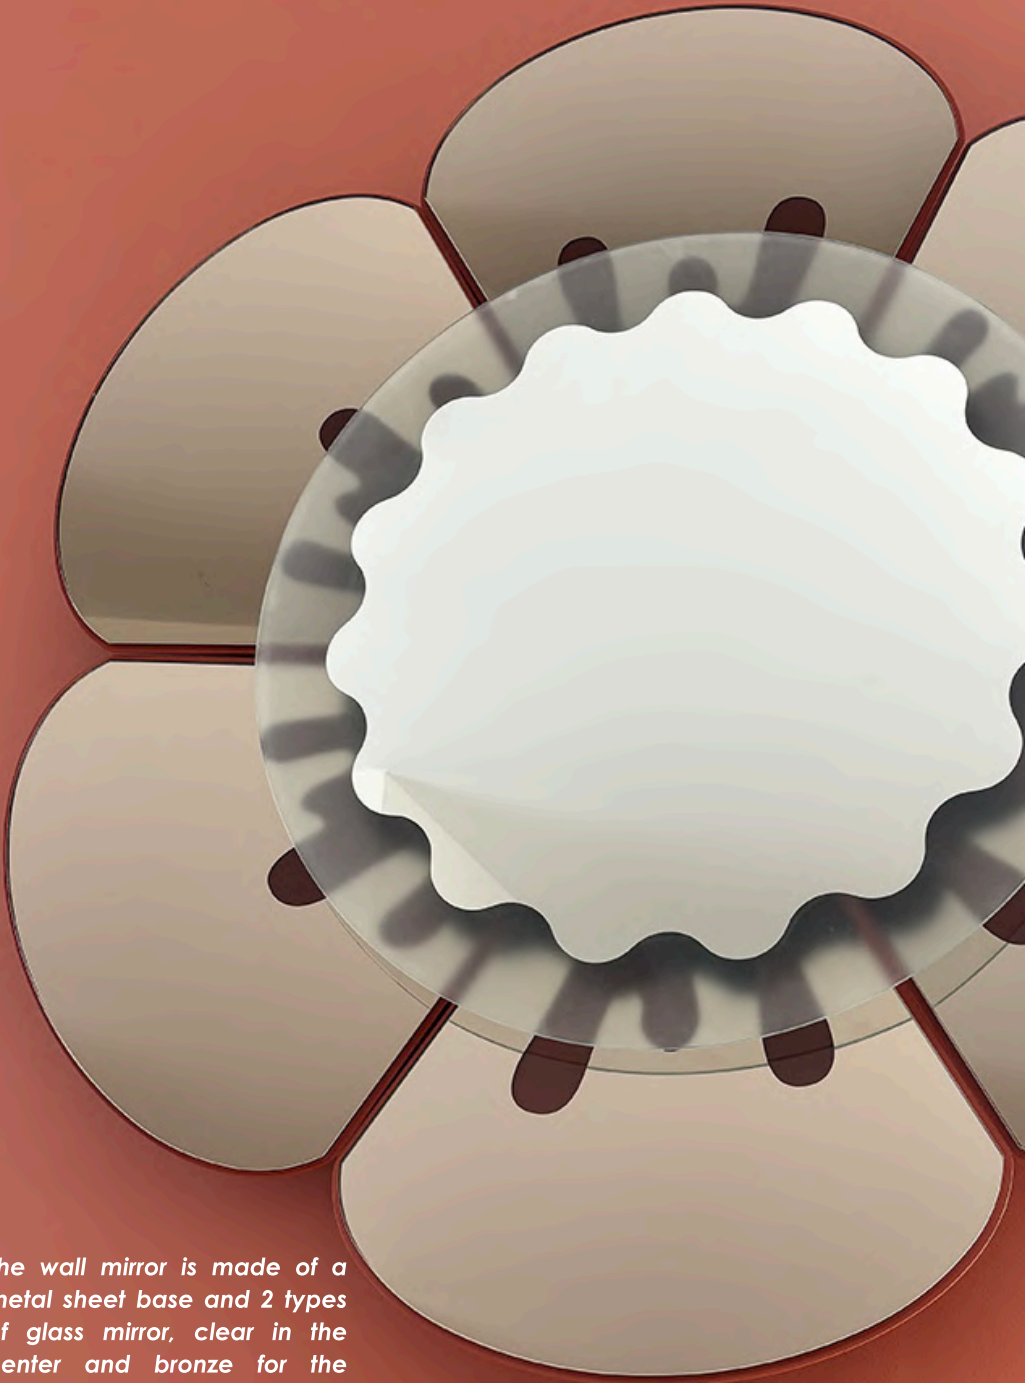

TOUT DE MOI

ARTIST'S STATEMENT

"I love every part of myself." This is the quiet invitation offered by the Tout de Moi mirror. Its inclined petals reflect multiple facets of the viewer at once, metaphorically revealing different parts of the self in a single glance. More than a reflection, it becomes a gentle reminder to see, accept, and love ourselves in our entirety.

The wall mirror is made of a metal sheet base and 2 types of glass mirror, clear in the center and bronze for the petals and it is equipped with LED strip light.

TERRA COLLECTION

ARTIST'S STATEMENT

I a world conquered by technology, I believe we need to be in touch with nature and it's raw beauty.

My aim with Terra is to offer a tactile experience that takes us to earth like textures: lava, metal erosion, hills crossed by rivers seen from above.

Terra wall mirror
is the first item in
the collection.
New items will be
available soon.

The frame is made of Acrylic resin. The patina is given by controlled oxidized iron powder. When in contact with moisture or directly with water, the patina slowly transforms and the rust intensifies, thus conveying the message of the passage of time.

BLOOM MIRROR

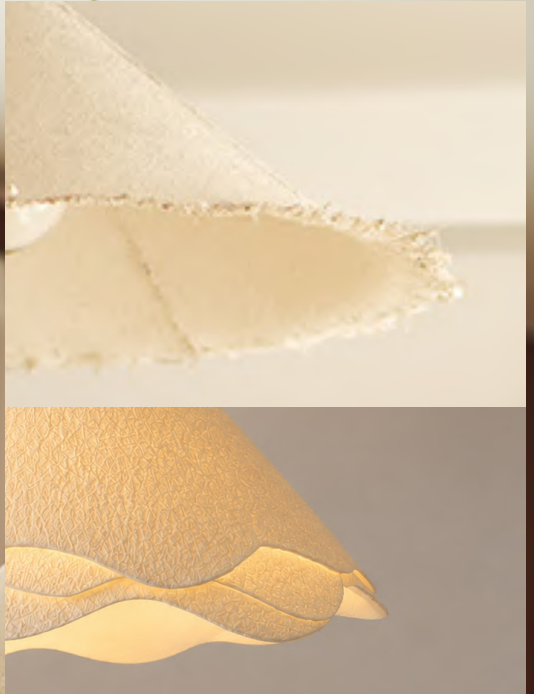

Bloom is a volumetric, highly decorative wall mirror with integrated LED strip light. It's generous size makes it the central piece in a room. The petals are made in bronze mirror, whilst the center is clear mirror. The stamens are made of acrylic glass and thermoformed by hand.

KON COLLECTION

ARTIST'S STATEMENT

The cone is an iconic, yet basic shape, used for so long in lighting design. But that didn't stop me from exploring it further more. From raw, fringed jute to clean-cut polyester edges, texture becomes a language, and the cone becomes its messenger.

The iconic shape of the cone is handmade in Acrylic resin reinforced with various materials, to achieve the desired texture and aesthetics.

We use jute for a natural, rough texture, polyester fiber laminate for a slightly transparent handmade paper texture, and fiberglass as a base for brush textures.

Kon can be made in various sizes, with diameters up to 85 cm and can be painted in any color code to match the interior.

HIBISCUS MINI FLOWER VASE

ARTIST'S STATEMENT

A flower holding another flower. This is Hibiscus.

Hibiscus is made of a small glass tube and an acrylic glass base in the shape of a Hibiscus flower.

Depending on the height at which we place the base on the glass tube, we will obtain different poetic compositions.

By reversing the acrylic base, you get a different angle and overall aspect.

COLOR YOUR LIGHT COLLECTION

ARTIST'S STATEMENT

Color your light is a decorative lighting kit designed to turn light into a space for creativity. Built as a modular lamp system, it invites children to personalize their own lampshades through color and drawing, becoming active participants in the creation of the objects that surround them.

COLOR YOUR LIGHT COLLECTION

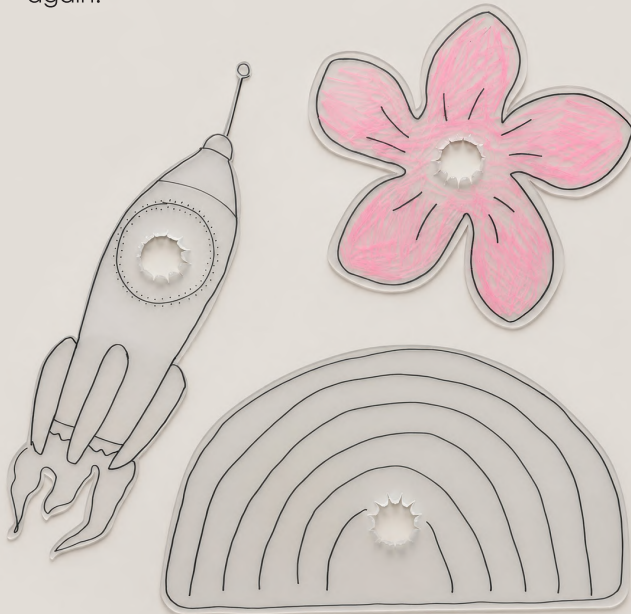

More than a functional light, each lamp becomes a small expression of its maker's imagination — unique, playful and personal.

The collection encourages creativity and self-expression while bringing a sense of ownership and emotional connection into the child's space.

The lampshades are made from satin acrylic glass with printed black outlines, allowing children to personalize them using colored pencils.

Want to change the colors?
YOU CAN!

The colored-pencil drawings can be easily removed from the lampshades using a sponge and liquid soap, so they can be colored and personalized again and again.

CUSTOM AND BESPOKE

Custom colours
Custom dimensions
Project-specific configurations
Small and medium production runs
Hospitality installations

Commissioned Bespoke Chandelier
inspired by Lotus Collection

ARTIST'S STATEMENT

I am personally involved in the making of every piece I create, so customization comes naturally to my practice, allowing me to adapt each product to the specific needs of my clients.

As a designer, I find it especially rewarding to develop bespoke pieces and explore new solutions for individual projects.
